# *Introducing Karen Bassett*

*Official carriage master to King Richard III*

Karen Bassett is one of Britain's top carriage drivers and has competed as part of Team GBR at numerous World Four-in-hand Championships.

She is currently regarded as the most successful lady driver in the world today. Having founded the business in 2003 Karen and her team have done some very high profile funerals including the six Philpott children and the reinterment of King Richard III.

For funerals she provides a matched pair of horses, which are trained to stand quietly and are extremely reliable in the heaviest of traffic. Teams of four and six, black or grey horses are also available.

Karen and her team pride themselves in turning the horses out to a very high standard in full English leather harness. To brighten things up the plumes and drapes are available in a large selection of colours. We have a selection of black, white, gold, silver, pink and rainbow hearses and a gun carriage.

For that extra special touch, we can offer out riders and Mourner's carriages.

Karen and her experienced team of drivers and grooms will provide a competent, reliable and trustworthy service, which re-creates the elegance of a bygone era. Although the horses are very fit, in the interests of their welfare, we would not expect a normal funeral cortege to exceed a distance of eight miles.
